Art Unit: 2815

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19-26 and 35-62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The previous rejection still applies. As stated, there is no support for an "interlayer insulating film" having the claimed levels of halogen and carbon. The specification states a gate insulating film having the claimed halogen and carbon levels. The interlayer insulating film is not originally stated to have the claimed properties. See the specification on pages 13 and 14 where the "main conditions" do not state the interlayer insulating film being formed with TCE.

Applicant's arguments filed 6/2/06 have been fully considered but they are not persuasive. Contrary to applicant's remarks the specification does not state the "interlayer insulating film" is formed with TCE and has the properties claimed. Page 5 lines 14-19 describe the gate insulating film, not the "interlayer insulating film". Likewise the specification on page 13 does not state that the interlayer insulating film 209 possesses the claimed carbon and halogen concentrations. The table of "main conditions" does not include TCE.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
